

# Introducing **Relay!** A new video recording and screen capture tool.

We're pleased to announce *Relay*, our new video capturing platform that will allow you to quickly and easily create videos, capture lectures, record events, and upload and share videos. This tool is available to all students, faculty, and staff and seamlessly integrates with Moodle.

## What can you do with Relay?

- **Lecture capture-** Record your in-class lectures and make them available to your students for on-demand viewing.
- **Screen capture-** Record your computer's screen to create tutorials and flipped classroom videos.
- **Event recording-** Whether a committee presentation, performance, or campus event, easily record and distribute your video.
- **Student assignments-** Give your students the ability to demonstrate what they've learned. Relay makes it easy for them to submit video recording assignments to you for review.
- **Devices-** You can use the *Fuse* app to create and upload videos to *Relay* (iOS and Android).

## Ready to use Relay?

All users (including students and staff) can create a Relay account.

1. Go to [potsdam.techsmithrelay.com](https://potsdam.techsmithrelay.com) and login with your regular username and password.
2. Select the **Record** button and download the recorder to create a video.
3. For help getting started, watch Relay's video [tutorials](#).

## **Moodle**

You can add videos from you Relay account to your Moodle course by using the *External Tool* option (watch [Adding a Relay Video to Moodle](#)).

## **Important!**

Video files may no longer be uploaded to Moodle or Helios (audio files may be uploaded to Moodle). Please read [Relay Policies](#) for full details.

## **Questions?**

Contact [cci@potsdam.edu](mailto:cci@potsdam.edu) for help with your Moodle or Relay questions.
