

**President's Council  
Meeting Notes  
January 17, 2018**

Enrollment

Enrollment numbers for undergrads for the spring semester are concerning, but staff led the Student Success Center are making calls and connecting with student to work to resolve the number of students who have not yet registered for spring. Enrollment application numbers for grad students for spring, summer and fall are up or at par with last year.

There is increased interest in programs in Watertown and we will be looking to add programs in that market.

An Enrollment Management consultant will be on campus in March to assess our entire enrollment structure.

Bias Incidents

Bernadette Tiapo shared a summary of bias incident reports made to the Bias Incident Response Team during the Fall 2017 semester. They included 43 reports, most of which fell under the category of harassment and the majority of which occurred in the residence halls. The full summary can be found [here](#).

Personnel

A number of processes and issues regarding personnel were discussed.
