#### SECTION I: PROGRAM INFORMATION

# **List of Programs**

List each program for an initial teaching credential below and indicate whether it is offered at the Undergraduate level (UG), Postgraduate level (PG), or both. (§205(a)(C))

THIS PAGE INCLUDES:

>>> List of Programs

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

• Teacher Preparation Program

# **List of Programs**

Note: This section is preloaded with the list of programs reported in the prior year's IPRC.

CIP Code	Teacher Preparation Programs	UG, PG, or Both	Update
13.121	Early Childhood Education	UG	
13.1202	Elementary Education	Both	
13.1203	Junior High/Intermediate/Middle School Education and Teaching	Both	
13.1302	Teacher Education - Art	UG	
13.1322	Teacher Education - Biology	Both	
13.1323	Teacher Education - Chemistry	Both	
13.1321	Teacher Education - Computer Science	UG	
13.1337	Teacher Education - Earth Science	Both	
13.1305	Teacher Education - English/Language Arts	Both	
13.1311	Teacher Education - Mathematics	Both	
13.1312	Teacher Education - Music	UG	
13.1329	Teacher Education - Physics	Both	
13.1318	Teacher Education - Social Studies	Both	

Total number of teacher preparation programs:

# **Program Requirements**

Check the elements required for admission (entry) into and completion (exit) from the program. If programs are offered at the undergraduate level and postgraduate level, complete the table for both types of programs. (§205(a)(1)(C)(i))

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

- Full-time equivalent faculty supervising clinical experience
- Adjunct faculty supervising clinical experience
- Cooperating Teachers/PreK-12 Staff Supervising Clinical Experience
- Supervised clinical experience

#### SECTION I: PROGRAM INFORMATION

# **Teachers Prepared**

On this page, enter the number of program completers by the subject area in which they were prepared to teach, and by their academic majors. Note that an individual can be counted in more than one academic major and subject area. For example, if an individual is prepared to teach Elementary Education and Mathematics, that individual should be counted in both subject areas. If no individuals were prepared in a particular academic major or subject area, you may leave the cell blank. Please use the "Other" category sparingly, if there is no similar subject area or academic major listed. In these cases, you should use the text box to describe the subject area(s) and/or the academic major(s) counted in the "Other" category.

If your IHE offers both traditional and alternative programs, be sure to enter the program completers in the appropriate reports. For the traditional report, provide only the program completers in traditional programs within the IHE. For the alternative report, provide only the program completers for the alternative programs within the IHE.

After entering the teachers prepared data, save the page using the floating save box at the bottom of the page.

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

Academic Major

#### THIS PAGE INCLUDES:

- >> Teachers Prepared by Subject Area
- >> Teachers Prepared by Academic Major

## **Teachers Prepared by Subject Area**

Please provide the number of teachers prepared by subject area for academic year 2021-22.

For the purposes of this section, number prepared means the number of program completers. "Subject area" refers to the subject area(s) an individual has been prepared to teach. An individual can be counted in more than one subject area. If no individuals were prepared in a particular subject area, please leave that cell blank. (§205(b)(1)(H))

#### What are CIP Codes?

No teachers prepared in academic year 2021-22

If your program has no teachers prepared, check the box above and leave the table below blank (or clear responses already entered).

What are CIP codes? The Classification of Instructional Programs (CIP) provides a taxonomic scheme that supports the accurate tracking and reporting of fields of study and program completions activity. CIP was originally developed by the U.S. Department of Education's National Center for Education Statistics (NCES) in 1980, with revisions occurring in 1985, 1990, and 2000 (<a href="https://nces.ed.gov/ipeds/cipcode/Default.aspx?y=55">https://nces.ed.gov/ipeds/cipcode/Default.aspx?y=55</a>).

CIP Code	Subject Area	Number Prepared
13.10	Teacher Education - Special Education	
13.1202	Teacher Education - Elementary Education	

CIP Code	Subject Area	Number Prepared
13.1203	Teacher Education - Junior High/Intermediate/Middle School Education	
13.1210	Teacher Education - Early Childhood Education	
13.1301	Teacher Education - Agriculture	
13.1302	Teacher Education - Art	
13.1303	Teacher Education - Business	
13.1305	Teacher Education - English/Language Arts	
13.1306	Teacher Education - Foreign Language

13.14	Teacher Education - English as a Second Language	
13.99	Education - Other Specify:	

## **Teachers Prepared by Academic Major**

Please provide the number of teachers prepared by academic major for academic year 2021-22. For the purposes of this section, number prepared means the number of program completers. "Academic major" refers to the actual major(s) declared by the program completer. An individual can be counted in more than one academic major. If no individuals were prepared in a particular academic major, please leave that cell blank. (§205(b)(1)(H))

Please note that the list of majors includes several "Teacher Education" majors, as well as several noneducation majors. Please use care in entering your majors to ensure education-specific majors and non-education majors are counted correctly. For example, if an individual majored in Chemistry, that individual should be counted in the "Chemistry" academic major category rather than the "Teacher Education—Chemistry" category.

#### What are CIP Codes?

Does	this teacher preparation	provider grant	aegrees upon	completion	of its programs?
	Yes No				

No teachers prepared in academic year 2021-22

If this provider does not grant participants a degree upon completion, or has no teachers prepared, leave the table below blank (or <u>clear responses already entered</u>).

CIP Code	Academic Major	Number Prepared
13.10	Teacher Education - Special Education

SECTION I: PROGRAM INFORMATION

# **Program Assurances**

Respond to the following assurances. Teacher preparation programs should be prepared to provide documentation and evidence, when requested, to support the following assurances. (§205(a)(1)(A)(iii); §206(b))

THIS PAGE INCLUDES:
---------------------

>> Program Assurances

## Drogram Accurences

Note: This section is preloa	ded from the prior year's IPRC.
------------------------------	---------------------------------

Program Assurances
<b>Note:</b> This section is preloaded from the prior year's IPRC.
1. Program preparation responds to the identified needs of the local educational agencies or States where the program completers are likely to tea based on past hiring and recruitment trends.
• Yes No
Preparation is closely linked with the needs of schools and the instructional decisions new teachers face in the classroom.      Yes     No
Prospective special education teachers are prepared in core academic subjects and to instruct in core academic subjects.  Yes     No     Program does not prepare special education teachers
Prospective general education teachers are prepared to provide instruction to students with disabilities.      Yes     No
Prospective general education teachers are prepared to provide instruction to limited English proficient students.     Yes     No
Prospective general education teachers are prepared to provide instruction to students from low-income families.      Yes     No

7. Prospective teachers are prepared to effectively teach in urban and rural schools, as applicable.

Yes

No

8. Describe your institution's most successful strategies in meeting the assurances listed above:

SUNY Potsdam continues to maintain its legacy for quality teacher preparation and complies with Title II assurances through collaboration with a number of external constituents including the School's alumni, PK-12 schools, and BOCES. Within the past few years, the school has also created a Professional Development School (PDS) Committee comprising key stakeholders (public school teachers, college faculty, school administration, and alumni), thus deepening its relationship with our school partners. The committee also developed strategic goals to address four areas identified as Building the Teaching Pipeline, Developing New Partnerships, Assessment of Existing Partnerships, and Professional Development. Additionally, the school maintains a Teacher Education Advisory Committee (TEAC) comprising education program faculty, arts & sciences faculty, school and district leaders, and superintendents. This forum also offers opportunities for discourse on hiring and recruitment trends, instructional changes as well as

providing insight into the needs of our local school districts. Internally, education faculty members also work across departments with Arts and Sciences faculty in curriculum development and to redesign course work to strengthen the content and pedagogical knowledge for our teacher candidates. Within departments, faculty address changes to a professional association and curriculum standards to meet core course requirements. Each program has developed at least 6-8 key assignments that are used for external accreditation purposes, but also demonstrate our candidates' content and pedagogical knowledge, impact on student learning, instructional practice, and professional dispositions. These assignments demonstrate our candidates' ability to make instructional decisions that new teachers face in the classroom and their preparation in core academic subjects to instruct in core academic subjects. Recognizing that the clinical experience is critical for teacher development, our Center for School Partnerships and Teacher Certification invests in promoting high-quality clinical experiences through their review of field experiences and student teaching placements. Survey Data is collected throughout our teacher candidate's experiences to establish integrity with teaching effectiveness. All individuals involved in the experience are surveyed ( teacher candidates, sponsor teachers, supervisors). Results are disseminated to program faculty to address concerns and contribute to program changes in this area. General education students who are looking to complete their masters in special education have the opportunity during their initial program to complete 30 credits in required courses including 6 credit hours of practicum that provides opportunities to apply techniques for evaluation and instructional programming for learners, educational assessment, implementation of Individualized Education Programs, (IEP's), and planning for instructional activities designed to meet identified student needs. Course work includes inclusive practices considering learner characteristics and needs, use of assistive technology, diagnosis and assessment, behavior management, literacy assessment and practices, and collaborative consultation with professionals and families. In our program development, consideration is also given to the preparedness of our general education teachers to provide instruction to students with disabilities and those who have limited English proficiency. In this 3-credit course, our initial program candidates complete a 15-hour field experience in special education. Requirements in these courses give our students opportunities to observe best practices with experienced teachers when working with students with disabilities. Likewise, requirements in literacy method courses promote discussion of socially and culturally responsive teaching, exploring research-based strategies and modifications for ensuring that students with limited English proficiency benefit from instruction in the regular education classroom. These classroom opportunities are significant in preparing our students for both the rural and urban contexts. Our completers often find employment in urban and rural school districts. Those seeking employment in rural school districts are often first-generation college students who return to their communities in the North Country to teach. Occasionally, some of these teacher candidates are from urban areas who secured jobs in these districts as a result of relationships fostered during their practicum and student teaching experiences. Given our location, and widely dispersed school districts, there are opportunities to work with diverse student populations (Native American, migrant and stationary farm workers of Mexican ethnicity, and children who are economically disadvantaged), which our teacher candidates value as important learning experiences.

## **Annual Goals: Mathematics**

Each institution of higher education (IHE) that conducts a traditional teacher preparation program (including programs that offer any ongoing professional development programs) or alternative route teacher preparation program, and that enrolls students receiving Federal assistance under this Act, shall set annual quantifiable goals for increasing the number of prospective teachers trained in teacher shortage areas designated by the Secretary or by the state educational agency, including mathematics, science, special education, and instruction of limited English proficient students.

#### (§205(a)(1) (A)(i), §205(a)(1)(A)(ii), §206(a))

**Note:** Last year's goal and the current year's goal are preloaded from the prior year's IPRC.

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

Quantifiable Goals

#### THIS PAGE INCLUDES:

- >> Report Progress on Last Year's Goal (2021-22)
- >> Review Current Year's Goal (2022-23)
- >> Set Next Year's Goal (2023-24)

## Report Progress on Last Year's Goal (2021-22)

1. Did your program prepare teachers in mathematics in 2021-22?

If no, leave remaining questions for 2021-22 blank (or <u>clear responses already entered</u>).

Yes

No

2. Describe your goal.

Our program's goal is twofold: to continue to provide opportunities for our students to attain strong knowledge and skills in math principles so that they can become effective specialists. We also aim to purposely make use of the past year and the restrictions and opportunities that have presented themselves to make our program more durable for the longer term, particularly in the ways we use virtual space interaction and real space interaction in conjunction with each other. We recognize the challenge of recruiting students into this field as many chose alternative careers for financial or other reasons. We remain hopeful and optimistic as we consider ways to add new students to the program. We have also begun a thorough alignment with the new NCTM standards for accreditation purposes.

3. Did your program meet the goal?

Yes

No

4. Description of strategies used to achieve goal, if applicable:

5. Description of steps to improve performance in meeting goal or lessons learned in meeting goal, if applicable:

Review Current Year's Goal (2022-23)
7. Is your program preparing teachers in mathematics in 2022-23? If no, leave the next question blank.
Yes No
8. Describe your goal.
Our goal is to transition our MST math program to become fully online which will increase enrollment.
Set Next Year's Goal (2023-24)
Set Next Year's Goal (2023-24)  9. Will your program prepare teachers in mathematics in 2023-24? If no, leave the next question blank.

## Report Progress on Last Year's Goal (2021-22)

1. Did your program prepare teachers in science in 2021-22?

If no, leave remaining questions for 2021-22 blank (or <u>clear responses already entered</u>).

Yes

No

2. Describe your goal.

Our main two goals are to increase our student enrollment and to offer an online version of our MST Science Education program online. The first goal of increasing enrollment is a challenge due to COVID, however, we have program faculty have been attending open houses, participating in Potsdam Spotlight with prospective students, writing welcome notes to accepted students, and meeting through Zoom with prospective students. There is a lot of time and dedication involved in reaching our first goal. Due to COVID, all of the courses within the MST program were offered online to the upcoming graduating cohort. This has given program faculty the opportunity to be creative in offering more courses online for non-traditional learners.

3. Did your program meet the goal?

Yes

No

4. Description of strategies used to achieve goal, if applicable:

5. Description of steps to improve performance in meeting goal or lessons learned in meeting goal, if applicable:

Review Current Year's Goal (2022-23)  7. Is your program preparing teachers in science in 2022-23? If no, leave the next question blank.
Yes No
8. Describe your goal.  Our goal is to continue to work towards getting all of our MST courses online using our Learning Management System (LMS) Brightspace. Our second goal is to have the BA program ready to accept students in the fall. Our third goal is to continue to recruit candidates in both the undergraduate and graduate programs.
Set Next Year's Goal (2023-24)  9. Will your program prepare teachers in science in 2023-24? If no, leave the next question blank.  Yes No  10. Describe your goal.

6. Provide any additional comments, exceptions and explanations below:

No
10. Describe your goal.

Review Current Year's Goal (2022-23)

7. Is your program preparing teachers in special education in 2022-23? If no, leave the next question blank.

SECTION II: ANNUAL GOALS

# **Annual Goals: Instruction of Limited English Proficient Students**

Each institution of higher education (IHE) that conducts a traditional teacher preparation program (including programs that offer any ongoing professional development programs) or alternative route teacher preparation program, and that enrolls students receiving Federal assistance under this Act, shall set annual quantifiable goals for increasing the number of prospective teachers trained in teacher shortage areas designated by the Secretary or by the state educational agency, including mathematics, science, special education, and instruction of limited English proficient students.

(§205(a)(1) (A)(i), §205(a)(1)(A)(ii), §206(a))

**Note:** Last year's goal and the current year's goal are preloaded from the prior year's IPRC.

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

• Quantifiable Goals

#### THIS PAGE INCLUDES:

- >> Report Progress on Last Year's Goal (2021-22)
- >> Review Current Year's Goal (2022-23)
- >> Set Next Year's Goal (2023-24)

Report Progress or	Last Year's	Goal (2021-22)
--------------------	-------------	----------------

Did your program prepare teachers in instruction of limited English proficient students in 2021-22?
 If no, leave remaining questions for 2021-22 blank (or <u>clear responses already entered</u>).

Yes No

2. Describe your goal.

3. Did your program meet the goal?

Yes No

4. Description of strategies used to achieve goal, if applicable:

- 5. Description of steps to improve performance in meeting goal or lessons learned in meeting goal, if applicable:
- 6. Provide any additional comments, exceptions and explanations below:

Review Current Year's Goal (2022-23)
7. Is your program preparing teachers in instruction of limited English proficient students in 2022-23? If no, leave the next question blank.  Yes  No
8. Describe your goal.
Set Next Year's Goal (2023-24)
9. Will your program prepare teachers in instruction of limited English proficient students in 2023-24? If no, leave the next question blank.  Yes  No  10. Describe your goal.

## **Assessment Pass Rates**

The pass rates table is populated from files provided by the testing company or state. The table provides information on the performance of the students in your teacher preparation program on each teacher credential assessment used by your state. In cases where a student has taken a given assessment more than once, the highest score on that test is used. In the case of a teacher preparation program with fewer than 10 scores reported on any single initial teacher credential assessment during an academic year, the program shall collect and publish information with respect to an average pass rate and scaled score on each state credential assessment taken over a three-year period. (§205(a)(1)(B))

Please note that this page does not have an edit feature as the pass rates have already been through several rounds of verification. If you identify an error, please contact RTI's Title II Support Center and your testing company representative.

Key terms in this section are listed below. Click on the link to view the definition(s) in the glossary.

## **Use of Technology**

1.	Provide the following information about the use of technology in your teacher preparation program.	Please note that choosing	'yes'	indicates that
	your teacher preparation program would be able to provide evidence upon request. (§205(a)(1)(F))			

Does your program prepare teachers to:

- a. integrate technology effectively into curricula and instruction
  - Ye
  - No
- b. use technology effectively to collect data to improve teaching and learning
  - Ye
    - No
- c. use technology effectively to manage data to improve teaching and learning
  - Yes
    - No
- d. use technology effectively to analyze data to improve teaching and learning
  - Yes
    - No
- 2. Provide a description of the evidence that your program uses to show that it prepares teachers to integrate technology effectively into curricula and instruction, and to use technology effectively to collect, manage, and analyze data in order to improve teaching and learning for the purpose of increasing student academic achievement. Include a description of the evidence your program uses to show that it prepares teachers to use the principles of universal design for learning, as applicable. Include planning activities and a timeline if any of the four elements listed above are not currently in place.

SUNY Potsdam seeks to prepare our teachers with an understanding of how various technological tools and practices can be an important part of the teaching and learning process. As a generation of digital natives, they often naturally respond to and experience technology use in their everyday college interaction through computer software like Microsoft Office Outlook, where they are able to access other applications and services beyond email management such as scheduling, note-taking, and web browsing. Another, such as our NAVIGATE software system facilitates timely communication for class scheduling and advising through texting and emails between our students and instructors. This software system prompts students to take proactive steps to increase the likelihood of academic gains and successful completion of college. Beyond, this interaction, there are also opportunities for learning how technology can be effectively integrated into the curricula and instruction with our available technological tools and resources. Each teacher preparation program either includes a Digital Literacy Skills course on preparing teachers to integrate technology through and/or infuse technology across the teacher preparation curriculum. Frequently noted is the use of our open-source Learning Management System (LMS) Moodle, which is used for blended learning and other e-learning projects. Assigned coursework also utilizes web-based projects prompting our teachers to explore, research, and access web-based archives as primary sources. Students showcase their learning and use of technology through visual slide show presentations such as power points, Prezi, and Google slides where they include images, videos, sound, and other effects. They also utilized the available smart boards available for use in the college classrooms when presenting. Similarly, course instructors utilize projectors, document cameras, videos, and other available technologies to model technology use and how these support differentiated instruction. Our Thomas O'Sh

across the curriculum. Attention is paid to what curricular topics benefit from the integration of technology as well as using technology to enhance classroom instruction. Our students often have opportunities to experience technology integration during practicum and student teaching experiences. The use of interactive whiteboards and student response systems (clickers) are familiar classroom tools that they integrate into their lesson planning. They are also able to observe how learning occurs with mobile and handheld devices such as cell phones, mp3 players, and tablet computers, along with supporting software that provides engaging and interacting learning skills in multiple content areas as well as for assessment purposes. Additionally, they also observe the benefits of simulations and game-based learning activities in classroom instruction and behavior management (Class dojo). These observations and experiences are often used as talking points for reflecting on technology use in their course work. Use of technology to collect, manage and analyze data: Taskstream is used as an assessment system to collect and report data for review. Our teacher candidates are directed to upload key assignments, create lesson plans using national standards available on this platform and respond to self-assessment tasks on their program's Direct Response Folio (DRF). Significant use of DRFs is evident during early field experiences and student teaching. Our students are also able to observe how technology tools and software can be used to collect, manage, and analyze data in the public-school classroom during their field experiences. For example, Google classroom and chrome books are used in many of the local school districts. Our students have experienced the benefit of communicating, collaborating, providing feedback, and analyzing data for classroom use. Recent access to Google classroom through the college has provided opportunities for further training and use of this software. Online and virtual learning as a result of the pandemic has also increased our teacher candidates' knowledge and skills in the use of technology. Personal experience with the use of technology to support assessment purposes occurs during our students' final semester. Successful teacher candidates illustrate their ability to support student learning through the use Taskstream and their Direct Response Portfolios (DRFs). They are required to design and upload learning segments that employ a range of research-based strategies and informal and formal assessment approaches that build on each learner's strengths, needs, and prior experiences. This performance assessment also requires videotaping of the classroom experience for further proof of successful teaching. Our students develop competency in videotaping and editing several weeks of classroom teaching before uploading it as a file. Through this performance assessment-based electronic portfolio, teacher candidates provide credible evidence of their ability to facilitate and impact learning by using technology to communicate their ability to plan, implement, assess student learning, and analyze data for future planning and instruction.

SECTION VI: TEACHER TRAINING

# **Teacher Training**

Provide the following information about your teacher preparation program.

Note: This section is preloaded from the prior year's IPRC.

HIS	PAG	F IN	ICI I	<b>JDES</b>	ŀ

>> Teacher Training

## **Teacher Training**

- 1. Provide a description of the activities that prepare general education teachers to:
  - a. Teach students with disabilities effectively

All our general education students take a 3-credit course in special education that provides them with the content to develop attitudes, skills, and knowledge on how to include students with disabilities in their classroom. Part of this course involves a 15-hour field experience component of the 3-credit course which allows our students to observe best practices with experienced teachers when working with students with disabilities. Recognizing that students with disabilities are a diverse group of learners who struggle in general education classrooms, our students receive instruction to meet the needs of these learners in keeping with federal legislation such as the Individuals with Disabilities Education Act (IDEA) and the Elementary and Secondary Education Act, (ESEA). This federal legislation promotes the teaching of students with disabilities as capable learners who are entitled to high-quality education and access to challenging curricula that can prepare them for fulfilling careers and postsecondary education.

b. Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education Act*.

Our students are taught how to write and utilize Individualized Education Programs (IEPs), which outlines the supports and services students will receive to meet their academic goals. They also learn the principles of Universal Design for Learning (UDL) as an approach to modify lesson plans and flexible assessment options to differentiate learning when addressing the diverse learning needs of students with disabilities in their classroom. Coursework is connected to field experiences during which they conduct observations of inclusive teaching techniques. They are also able to become familiar with authentic IEP's and observe the collaborative nature of this team approach involving the classroom teacher, parents, and other resource personnel, and their unique roles in improving the academic outcomes for the student through accommodations and modifications.

c. Effectively teach students who are limited English proficient.

Our general education teachers are also prepared to effectively teach students who are limited English proficient. Our faculty continues to acknowledge the changing demographics of the school-age population and the growing numbers of Non-English c-school classrooms and ensures that coursework is developed to address this observation at the awareness and skill levels. In the general education program, course work involves the understanding of culturally responsive classrooms environments, the valuing of diversity, exploring strategies and modifications for ensuring that ESOL learners benefit from instruction in order to be successful. While these strands are incorporated into all methods courses, the emphasis is given in coursework that involves the teaching of literacy education which focuses on beginning literacy skills and language development. Prospective general education teachers who are perceived as the primary language providers to these PreK-6th grade ESOL learners are provided with the knowledge and skills in literacy methods coursework to ensure developing awareness and confidence when working with these students. They are able to become familiar with specific strategies that benefit the ESOL learners' development of oral and written language proficiency, explore ELA content standards, engage in the implementation of research-based instructional procedures and use materials to address those learners' needs. These approaches across all programs also provide consistency in providing our general education teachers with the knowledge base they will need to complete the NYS certification requirement of the Educating All Students (EAS) Test.

2. Does your program prepare special education teachers?

a.	Teach	students	with	disabilities	effectively
----	-------	----------	------	--------------	-------------

b. Participate as a member of individualized education program teams, as defined in section 614(d)(1)(B) of the *Individuals with Disabilities Education Act*.

c. Effectively teach students who are limited English proficient.

## **Contextual Information**

On this page, review the questions regarding your program's use of technology, and update as needed.

Note: This section is preloaded from the prior year's IPRC.

#### THIS PAGE INCLUDES:

>> Contextual Information

## **Contextual Information**

Please use this space to provide any additional information that describes your teacher preparation program(s). You may also attach information to this report card (see below). The U.S. Department of Education is especially interested in any evaluation plans or interim or final reports that may be available.

Our EPP recently concluded our accreditation with CAEP. Our self-study provided us with an opportunity to revisit our programs with the goal of ongoing improvement. Each program are revisiting assessment plans and goals to ensure our candidates are prepared to teach in P-12 classrooms. Within recent months our overall enrollment is now beginning to grow again and we are expecting to see an increase in next year's report.

## **Supporting Files**

No files have been provided.

You may upload files to be included with your report card. You should only upload PDF or Microsoft Word or Excel files. These files will be listed as links in your report card. Upload files in the order that you'd like them to appear.
