Abstract. This book (written by Anthony Betrus and Florence Martin) provides a comprehensive overview on the theories, processes, and solutions relevant to effectively creating, using, and managing digital media in a variety of instructional settings. In the first section of the book, the authors provide an overview of the theories, development models, and principles of learning with digital media. In the second section, the authors detail various digital media solutions, including: Instructional Videos, Instructional Simulations and Games, Online Learning, Mobile Learning, and Emerging Learning Technologies. Overall, this book emphasizes the theoretical principles for learning with digital media and processes to design digital media solutions in various instructional settings. The readers are also provided with multiple case studies from real world projects in various instructional settings. The presentation will be covering the process of creating the book, especially the process of taking class teaching materials and refining and improving them for the publication.
