Career Services

Lougheed Center for Applied Learning
SUNY Potsdam

Career Status Report | Class of 2017

Career Services within the Lougheed Center for Applied Learning has conducted our annual First Destination Survey for the class of 2017, with data collection from alumni within approximately six months to one year after commencement. The survey data gathered demonstrates graduate's employment status and graduate or professional school enrollment. The Career Status Report is designed to reflect the uniqueness of SUNY Potsdam, and follows the National Association for Colleges and Employers (NACE) First-Destination survey standards and protocols.

The purpose of this survey is to demonstrate to current and prospective students the employment and continuing education accomplishments of SUNY Potsdam's graduates. This data will also support academic departments and administrators to better understand the areas of campus growth and potential.

Career Services has undergone a major transitional year, as the former Career Planning office had no staffing continuity due to an entire office retiring. This led to the adoption of Career Services into the Lougheed Center of Applied Learning in September 2017. Responsibility for the survey was delegated in January 2018 to a new member of the Career Services staff. Our office has been in contact with the institutional research office to learn about the magnitude of the survey and the processing. We have also undergone IRB review, for the first time in February-March 2018. These transitions have led to a limited amount of staffing to manage, conduct, and oversee the report. The limited institutional resources and staffing has resulted in a low response rate and potential variance in data quality. Due to this series of transitions, Career Services has concerns that this data is imprecise, but it was gathered to the best of our ability during this transition.

Methods

The survey encompasses alumni who graduated in Fall 2016, Winter 2017, Spring 2017 and Summer 2017. Graduates were asked to complete the survey via emails, where a total of seven reminders have been circulated between March-July of 2018. The survey was also distributed in person in March 2017 at the "Grad Finale" as students received their caps and gowns for graduation. SUNY Potsdam's Institutional Research & Assessment Clearing House data for graduate school enrollment was reviewed in April 2018.

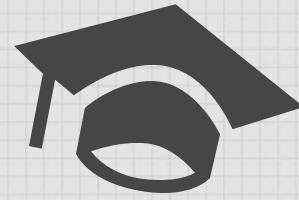

* Please note: Data from Grad Finale has been collected by the former Career Planning office.

Report Reliability: The following two possibilities relating to students completing the survey may affect the reliability of this report: 1) We believe that we are more likely to receive surveys from employed graduates, and we expect that students who do not have employment are less likely to respond to the survey. (To further assist unemployed students, we included resources about our specific employment related services). 2) It is assumed the survey is more likely to be returned from unemployed graduates living at home. We cannot determine the influence of these possibilities on this survey. Our hopes is that the data balances these potential factors, giving us an accurate picture and canceling out any skewed data.
