COMPUTING YOUR GRADE POINT AVERAGE (GPA) AND CUMULATIVE GPA (CGPA)

GPA =QUALITY POINTS EARNED
   GPA HOURS (SEMESTER HOURS ATTEMPTED FOR A NUMBERIC GRADE**) (**DO NOT COUNT COURSES GRADED S, S*, U, U*, I, M*,W & W***)**

CGPA =OLD QULAITY POINTS + NEW QUALITY POINTS
   GPA HOURS (OLD SEMESTER HOURS ATTEMPTED FOR NUMERIC GRADE**)**
   + NEW GPA HOURS (ONLY GRADES FROM POTSDAM COLLEGE**)**

POSSIBLE GRADES:

4.0	**3.3**	**2.7**	**2.0**	**1.3**
3.7	**3.0**	**2.3**	**1.7**	**1.0**

EXAMPLE:

If your semester grades were:

possible grade of 3.3	**x**	**3 credit hour course**	**=**	**9.9 quality points**
possible grade of 2.0	**x**	**2 credit hour course**	**=**	**4 quality points**
possible grade of 4.0	**x**	**4 credit hour course**	**=**	**16 quality points**
possible grade of 3.0	**x**	**2 credit hour course**	**=**	**7.4 quality points**
possible grade of 1.7	**x**	**4 credit hour course**	**=**	**6.8 quality points**
		15 hours completed		**44.1 quality points**

GPA = QUALITY POINTS EARNED   =   44.1 = 2.94
GPA HOURS (SEMESTER HOURS ATTEMPTED   15
              FOR NUMERIC GRADE)

NOTE:
GPA's are not rounded up (if your calculations are 2.9473... your GPA would be 2.94).
