Assistive Technology to Foster Student Learning and Retention

Abstract: Assistive technology is embedded in the world around us and every year the technology becomes more powerful and obtainable to the everyday student. Learn how you can share this technology with your students to foster student learning and retention. This interactive presentation will share free apps and built-in technology that could help students write papers, take notes, spend less time on reading and help with time management all things that could tie back to the success of your students.
