How to Calculate Your Quarantine End Date When You Live With a Person Who Tested Positive

When you live with someone who has tested positive, your quarantine order will have an end date of 30 days out from the date you were placed into quarantine. You can calculate your actual quarantine end date based off of the descriptions and formulas below, pending confirmation from the local health department.

1. If you live with someone who has COVID-19 (e.g.; roommate, partner, family member), and that person has isolated by staying in a separate bedroom and you have had no more contact with that person. Your last day of quarantine is 14 days from your last date of contact.

   \[
   \text{Your last date of contact with positive} \quad + \quad 14 \text{ Days} \quad = \quad \text{Your last day in quarantine} \quad (\text{January 15th})
   \]

2. If you live with someone who has COVID-19 and you cannot separate from that person (e.g., you are providing direct care for them while they are sick, there are no separate bedrooms, or you live in close quarters and you are unable to to keep 6 ft away). Your last day of quarantine is 14 days after the person who has COVID-19 meets the criteria to end isolation.

   \[
   \text{You started quarantine} \quad (\text{January 5th}) \quad \rightarrow \quad \text{Positive person's release from isolation} \quad (\text{January 15th}) \quad + \quad 14 \text{ Days} \quad = \quad \text{Your last day of quarantine} \quad (\text{January 29th})
   \]

3. If you live with someone who has COVID-19 and you started your 14-day quarantine, but you ended up having contact with that person during your quarantine period. You will have to restart your quarantine period from the last day you had contact with the person who has COVID-19.

   \[
   \text{You started your quarantine} \quad (\text{January 5th}) \quad + \quad 14 \text{ Days} \quad = \quad \text{Your last day of quarantine} \quad (\text{January 19th})
   
   \text{But}
   
   \text{You have contact with the positive person again} \quad (\text{January 8th}) \quad + \quad 14 \text{ Days} \quad = \quad \text{Your last day of quarantine} \quad (\text{January 22nd})
   \]
