Eclectic (ec·lec·tic /əˈklektik/)

adjective

1 : composed of elements drawn from various sources; also : heterogeneous

2 : selecting what appears to be best in various doctrines, methods, or styles

Eclectic comes from the Greek eklektikos (meaning "selective"), from the verb eklegein, "to select." Eclectic was originally applied to ancient philosophers who were not committed to any single system of philosophy but instead selected whichever doctrines pleased them from every school of thought. Later, the word's use broadened to cover other selective natures. "Hard by, the central slab is thick with books / Diverse, but which the true eclectic mind / Knows how to group, and gather out of each / Their frequent wisdoms...." In this 19th century example from a poem by Arthur Joseph Munby, for example, the word is applied to literature lovers who cull selective works from libraries.

The Eclectic Ensembles are facilitated by Drs. Andrea Maas and Nils Klykken who helped to develop the following program by drawing upon the assets and interests of the musicians. Each performance reflects a critical process by musicians to identify and evaluate the repertoire they will study, as well as how and why they will perform this music. An emphasis on process and collaboration has been central to our transition back to making music together, in person. We are grateful to be able to share this work with one another and with you, our audience. For additional information visit our digital program here:
